## RE-EDITION

A re-edition of Lorena Canals' iconic designs inspired by nature.

***"There's nothing more essential than nature, providing us a color palette that will never go out of style" Lorena Canals***

January 2020.- Lorena Canals presents her iconic designs in a new color palette. 8 designs based in our bestsellers summing up to 37 new references, where we can find washable rugs in different sizes, pouffes and floor cushions. They are designed to be mixed and matched between them or with previous collections. A perfect collection, with designs that will forever last in every home.

With this new collection Lorena Canals has returned to its essence; with this Re-edition Collection, she is reinventing her classic best-sellers that were originally designed with intense, modern or classic baby colors, now transformed into softer, earthy tones. Giving the opportunity to enjoy our iconic designs in new elegant versions. For this collection the designer inspired herself on her love for the environment. Bringing earth and nature into the home was her first objective when she started developing this collection.

**Re-edition collection** is based on some of our 6 Bestsellers Tribu, Monstera, Kaarol, Bubbly, Hippy Dots, and Sleepover Pouffe Lou providing an elegant, soft, vintage, and earthy look introducing five new colors: olive, vintage nude and honey tones, soil brown and our classic natural. The colors used are never plain, but rich in shades thanks to the use of melange yarns, imitating the subtle color nuances of nature, creating uniqueness and elegance to each piece.
