# GALAXY COLLECTION

## 50th anniversary of the First Man on the Moon

To celebrate Apollo 50th Anniversary, Lorena Canals reunites falling stars, planets, satellites, rockets and touches down as one of the great inspirations of the season for young and old alike: rugs, cushions and wall hangings that are remarkable for their shape and originality, lending free rein to the imagination.

May 2019.- This 20th of July we are celebrating the 50th anniversary of the moon landing. The Galaxy collection from Lorena Canals is an homage to outer space. Integrates two rug designs – Milky Way and Universe – four cushions representing the Moon, Mars, Saturn and a rocket, a wall hanging that combines stars, planets, satellites, and heavenly bodies, and Galaxy Sky recreating a starry night.

New cushions in the Lorena Canals Galaxy collection: Rocket 30x65cm, Mars 40x40cm, Saturn 40x60cm and Moon 40x40cm

The rugs in the *Galaxy* collection are the designer's **first Black & White collection** aimed at children, although they also work in more grown-up settings. Standing out on a black cotton background are details in the natural cotton colour such as the spiral that traces out the shape of the Milky Way with the various planets, a rocket, stars, Mars, meteorites, a rocket...and not forgetting the Moon!

Milky Way 140x200cm (169€.) and Universe 140x200cm (240€.), Galaxy Sky 100x120cm (79€), Galaxy wall hanging 45x50cm (49€.), Mars cushion 40x40cm (39€.), Moon cushion 40x40cm (39€.), Rocket cushion 30x65cm (39€.), and Saturn cushion 40x60cm (39€.),

(continues...)

Made entirely by craftspeople, *Milky Way* and *Universe* rugs are manufactured using the “loop” technique, lending them a fluffy and agreeable texture that ensures each rug is unique and no two are exactly alike.

Washable rugs and cushions from the *Galaxy* collection with some of the firm's other new offerings

The cushions in the *Galaxy* collection, which can be washed in a conventional washing machine without removing the filler, are striking for their soft, original and fluffy qualities. *Mars*, *Moon*, *Saturn* and *Rocket* are hand-made by master craftsmen, with a compact cotton fabric, just like the base of the rugs, in the natural colour of cotton. Their irregular finishes, attributable to the craftsmanship that goes into their manufacture, and embroidered details such as the red rivers of Mars, the craters of the Moon, the blue rings of Saturn and the vapour trail of the rocket lend them a unique and exclusive touch.

Walls take on a special role this season, and the designer, in line with the latest international trends in interiors, has created a wall hanging that combines all the motifs to be found both in the collection's rugs and in the cushions: the rocket, star, planets and small meteorites in red and black. These shapes have been embroidered and filled individually by artisans and are a miniature replica of the *Galaxy* collection.
